

# Structural Steel

INNOVATION. NEW TECHNOLOGY.  
BETTER PRODUCTS.

**Rigid is recognized as a leader in the industry with our innovation, use of new technology to manufacture better products. When choosing a manufacturer, choose wisely...choose Rigid.**

## Capabilities

Rigid has developed the most state of the art manufacturing and material work flow in the industry. Our innovative use of technology and machinery provide the highest quality building systems available at competitive pricing that gives you, the customer the extra savings. Rigid provides detailing and fabrication capabilities ranging from single-story to multi-story buildings.

Service is delivering a quality product on time and fabricated to exact standards using automated CNC controlled machinery and robotics throughout the manufacturing process. With nearly 200,000 square feet dedicated to structural fabrication, Rigid can handle virtually any project.

Rigid's professional staff of engineers can assist with any and all technical inquiries. All welding and welders are qualified in compliance with AWS D1.1 and D1.3 codes of construction. Management includes a welding engineer with over 30 years experience in the field of welding and an AWS Certified Welding Inspector (CWI).

As part of Rigid's commitment to quality control, we are audited every year by AISC as part of Rigid's AISC Category MB certification for the pre-engineered side of the business. Our structural shop must complete the stringent requirements of the AISC program which insures all customers with a quality product.

# Equipment

Automated Welding Machine

Transfer Robot

Iron Maker

Horizontal Saw

Knee Mill

Lathe

Press Brake

CNC Beam Line

CNC Plasma Cutter
